

3D Portal

Steps to setup project

Step 1.

Set up the Development Environment

You need to set up your development environment before you can do anything.

Install [Node.js®](#) and [npm](#) if they are not already on your machine.

Then install the [Angular CLI](#) globally.

```
npm install -g @angular/cli
```

Step 2.

Install mysql on machine (xampp / wamp)

Import database (portal.sql file on mysql)

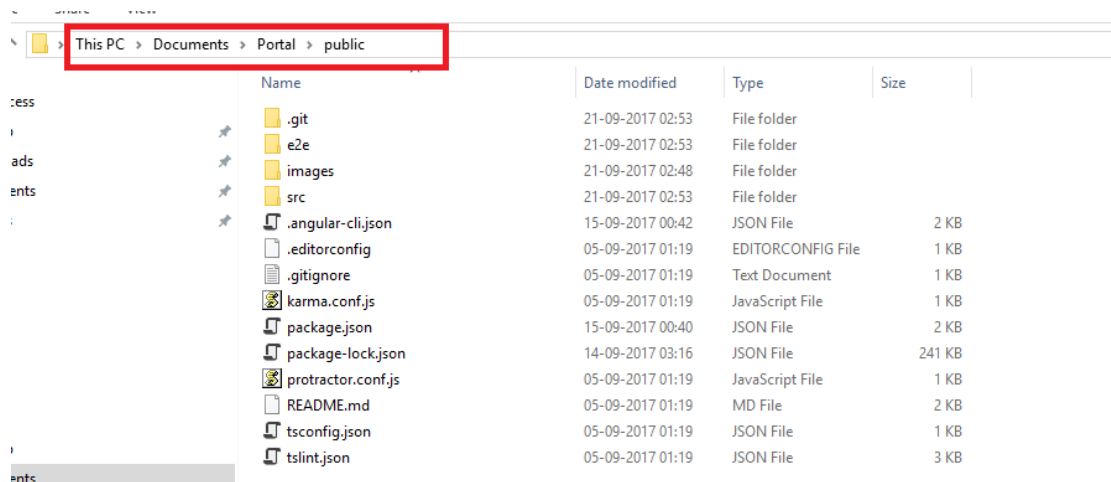

Step 3.

Open project Locally

- ✓ Open command prompt with project location path [portal]
- ✓ Type command npm install (this will install all packages for Nodejs)
- ✓ Run Node Server

```
C:\Windows\system32\cmd.exe - node index.js  
  
E:\3D-Model\Research\portal>node index.js  
connected
```

- ✓ Open another command prompt [folder location should be public]
- ✓ Type command npm install (this will install all packages for angularjs)

✓ and type **ng serve --open** command to run project

```
@angular/cli
E:\3D-Model\Research\portal\client>ng serve --open
Your global Angular CLI version (1.4.2) is greater than your local
version (1.3.2). The local Angular CLI version is used.

To disable this warning use "ng set --global warnings.versionMismatch=false".
